

## THE BULL SNOWBERRS

Dull Day On the Floor of the Mining Stock Exchange.

## A FEATURELESS MARKET

CHLORIDE POINT AND VALEO THE ONLY DEALERS.

The La Sal Mountains—A Section Which Will Outlive Leadville In Time—The New Sensation—Tintic Boys Make a Visit to the Great Silver King—Strike in the Redwing—Another Placer Discovery—The Little Carls—Killed at the Mammoth—South Swansea Dividend—Silver and Lead—Ore and Bullion—Mining Notes and Personalities.

The listed stocks suffered a complete whitewash yesterday, and outside of the establishment of quotations, failed to participate in the dealings during the call in the pit of the exchange.

As a matter of fact, but little change was noted in the quotations on this class of securities, with the exception that Centennial-Eureka and Mammoth were considerably stronger than during the previous call, while Silver King sustained losses in the offerings.

The unlisted securities were but little better in the way of sales. Chloride Point and Valeo being the only shares to chronicle transfers, the former showing gains and increased popularity, while the latter was able to hold its own in good shape. Dexter was a favorite and recorded marked gains, the stock being in good demand at \$1.60, with offerings at \$1.75.

After the call of the listed securities, the attention of the brokers was called to the application of John A. Hatfield for membership in the exchange, the result being that Mr. Hatfield was admitted to the pit by a unanimous vote, with acclamation, and he was given the glad hand.

The application of the Daisy company to have its name enrolled with the list of stocks was also laid before the board, the result being that the name of this west pit producer will adorn the board hereafter, and it is expected that dealings in its shares will be of frequent occurrence.

The transactions of the day were as follows:

### SALES OF STOCKS.

200 Chloride Point at \$1.10  
100 Valeo at 51 cents.

The closing quotations were as follows:

### CALL OF LISTED STOCKS.

NAME OF STOCKS	High	Low
Alta	1.40	1.35

### THE LA SAL MOUNTAINS.

#### A Section Which Will Outlive Leadville In Time.

In commenting on the La Sal mountains and the great mineral resources of this portion of Utah, the Denver News says:

"Another prospector from the copper-laden La Sal mountains, this time one of the few who, four years ago, realized the enormous wealth contained in the southwestern corner of Colorado, is stopping at the Windsor. J. W. Angell, who cohes every prediction for the future glory of that territory as recently made by Dick Dillon, says that some of these days the people of Colorado will be astonished to learn of the vast deposits of copper within the limits of their state.

"It will soon be known as a rival to Cripple," said Angell last night. "The vast, rich deposits that only await the advent of more prospectors. Our company has properties on both sides of the line, the principal ones being on La Sal creek. We are now erecting a smelter that will employ 50 men. I located most of the company's properties, and without exception they are rich. In fact, the copper carries enough gold and silver to pay for the mine and treatment of the rock. In some places the ground bears 70 per cent copper. I have some specimens in Denver now running 30 per cent. The Rio Grande Western and the Rio Grande Southern are both making of running a line to this new camp. It will require about 25 miles of road. Twenty years ago prospectors looked for gold in this region, but failed to find it in sufficient quantities. They didn't want copper, because it wasn't considered of much value at that time, and no railroads were near the ground. The La Sal mountains and the country to the south are places the mine should look to. The ground is all rich, and there is plenty of it vacant."

### STRIKE IN THE REDWING.

#### Important Disclosure In This Markham Gulch Mine.

As mentioned in these columns a few days ago, two of the officers of the Redwing Mining company had left for Bingham, for the purpose of taking out a shipment of ore from the company's mine, which is located in Markham Gulch, but a short distance from the main body of the camp.

It was the intention of the company, in doing this work, to take the mineral from what is known as tunnel No. 2, and it was not long after operations were fairly begun before a new chute of ore was encountered, the pay streak measuring 18 inches in width, and while it was believed that this was good shipping grade, its true value was not known until yesterday, when samples of the vein, brought in the previous day by J. J. Corum and Ed McCarrick, were tried and the result was that the metallic values of 15 per cent copper, 50.65 per cent lead, 74.3 ounces silver, and \$103.65 in gold to the ton, or an aggregate of over \$200 to the ton.

The officers of the company are highly elated over the important discovery, as well they may be, and a shipment of ore from the new find will be made at once.

### THE NEW SENSATION.

#### Tintic Boys Make a Visit to the Great Silver King.

W. J. Lawrence has returned from a visit to Big Cottonwood canyon, where he made an inspection of the New Sensation, which he is interested with the claim that the vein is a new discovery.

The New Sensation is a big low grade copper proposition of much promise, and The Herald is informed that in its vein the metal is contained in 12 to 15 feet in width has been stripped for a distance of 75 feet, the average assay of the whole mass being 45 per cent copper, 11.65 per cent lead, and 1.35 ounces silver to the ton.

The vein is now employed in the development of the mine, and in the spring it is the intention to put on more men and work the property in an extensive manner.

Mr. Lawrence was accompanied by Messrs. Bone Wheeler, Tommy Croxall and Will Dinwoodey, the party going on over the dip to Big Cottonwood, where they were courteously entertained by Hon. Tom Kearns of the Silver King, who conducted the boys through this new discovery, and produced what, doubtless, is the greatest silver and lead producer in the west today, and it is stated that although the company gives employment to a force of 300 men, the small party of men, who are lost in the miles of workings in this property.

Another Placer Discovery.

Democrat, Baker City, Ore.: At the mercantile house of Baer & Sommer last evening a Democrat reporter met Messrs. William Pickens and Aaron Bowen, two lucky prospectors, who were having a batch of nuggets weighed on the gold scales preparatory to making purchases of supplies.

The reporter learned that the placer find of Pickens and Bowen is situated on Pine creek, in the Upper Burnt river section, and the statement of these gentlemen was that from a hole 48 ft. and 1 ft. deep they had mined out \$25. One piece, the largest, was what is called "wire" gold, and weighed about \$15.

The find was made only a few days ago, and Pickens and Bowen think they have a bonanza. Of course the ground can only be worked during the spring season, when water is to be had, but it is in a most favorable locality, and a good run can be had during ordinary seasons.

The Little Carls.

Hon. C. V. Wheeler of the South Swansea, who is in from Silver City, states with this privacy is holding its own in a most gratifying manner.

In speaking of the southern end of Tintic district, Mr. Wheeler stated that a large amount of effective work was being done in that locality, and with very encouraging results, and he expressed the opinion that in course of five years Silver City would be as large a camp, if not larger, than Eureka.

Mr. Wheeler also referred to the recent strike in the Little Carls, and adjoining the Rabbit's Foot, and he assured The Herald scribe that the strike in this property was highly important, and that in the bottom of the 140-foot shaft the entire width of the workings was in ore running high in silver and copper, the shaft having followed down a body of rich mineral for a hundred feet, at least.

The Little Carls is owned by Lowry and his partner, and is without doubt the making of a bonanza proposition.

Killed at the Mammoth.

On Saturday last week a miner by the name of Harper was killed in the workings of the Mammoth mine, in Tintic district, by falling down a stope, but the details of the casualty have not been made public as yet.

The Mammoth Mining company has its men insured through Young & Young of this city with the Frankford Accident Insurance company of Germany, and this company will stand between the Mammoth company and the plaintiff in any suit for damages which may arise over accidents or deaths occurring in the mine through carelessness or through any neglect on the part of the company.

South Swansea Dividend.

The directors of the South Swansea Mining company held a meeting yesterday and declared a dividend of 5 cents a share, or \$7.50, payable on Oct. 4, the transfer books of the company closing on Sept. 20, to be reopened Oct. 5.

Silver and Lead.

The silver and lead quotations yesterday were as follows:

Bar silver, 69 15-16 cents.  
Lead, brokers', 33.55.  
Copper, casting, 11 cents.

Ore and Bullion.

The ore and bullion receipts yesterday were as follows:

McCormick & Co., ore, \$4,300; gold bars, \$2,100.  
National Bank of the Republic, gold bars, \$1,200.  
T. R. Jones & Co., bullion, \$21,800; ore, \$19,000.  
Bamberger & McMillan, ore, \$3,577.

Mining Notes and Personalities.

Two lots of Grizzly, from Alta, were on the market yesterday.

The Horn Silver was in the market yesterday with five carloads of concentrates.

The Consolidated of Tintic, was in the market yesterday with two cars of high grade ore.

The Grand Central had another shipment of silver ore of good ore at the sampler yesterday.

The Daisy will be called among the listed securities, and it is expected that this west pit security will prove a winner in every sense of the term.

Professor M. E. Jones was in Park City and made an examination of the Putnam group, which, he says, is looking well with a good outlook for the future.

Hon. John Dorn of the Mercur, went out to the mine yesterday with two Boston capitalists, Messrs. Charles J. Devereux and Isaac H. Meserve, who made a careful examination of this great dividend payer.

It is stated that the probabilities are that Dick Sutton will be appointed superintendent of the Galena mine at Fish Springs. Mr. Sutton was formerly superintendent of the Utah mine and is a first-class miner in every respect.

Mining World, Butte, Mont.: G. H. Peckard of Mercur, Utah, and D. H. Andrews of Boston, who may become interested in a local mining enterprise, arrived in Virginia City yesterday. Peckard was a resident of this city some years ago.

The officers of the Fissure company, whose property is located near Diamond, in Tintic district, are feeling much encouraged, as the showing in the workings would indicate the near presence of an extensive deposit.

Wasatch Wave: John Turner has just filed an order at the Valeo mine for 12,000 feet of lumber for their boarding.

Word comes from the Columbia, on Lion Hill, that in the drifts from the bottom of the Hoax, the splendid bodies of milling ore have been uncovered, the mineral running 20 ounces or more in the white metal. Noesler's company, who through the ore zones there are chutes of high grade shipping stuff.

"King" Carver of Beaver Lake district, writes that he has discovered a body of mineral in granite, the vein being 28 inches in width, while the ore is a hard, brownish granite, and is expected that the mines and prospects of Beaver Lake district will make a great record for themselves in the near future.

R. H. Officer, of R. H. Officer & Co., assayers, has returned from a fishing and hunting trip up in Idaho. Mr. Officer was accompanied by Matt Browning, J. H. Clive, J. A. Clark and John Anderson, and he reports that they had lots of sport and bagged game and fish galore, besides which he took quite a number of fine photographs of the country.

Denver Post: The Blue mountain region of Utah is showing considerable profitable development. A high-grade gold ore is showing in the Copper Queen. It is a better grade than the gold-copper ore shipped in the upper workings. A body of 42 gold and silver ore is opened in the Dickinson. The Dream is in shipping ore, and the Grand View has ore showing considerable free gold.

T. A. Wickersham and Chan Gardiner have returned from Dutch mountain, where they made an examination of the Columbia silver-lead mine, in which both are high-grade silver ore. Gardiner states that the mine is in a promising condition, but that during the temporary absence of the owner, he has been selling someone had appropriated a wagon load of high grade ore that had been sacked in the Copper Queen. It is a vein extends clear across the face of the tunnel and the values have been found in the Copper Queen. The mine is opening into the vein, and a good run can be had during ordinary seasons.

The Little Carls.

Hon. C. V. Wheeler of the South Swansea, who is in from Silver City, states with this privacy is holding its own in a most gratifying manner.

In speaking of the southern end of Tintic district, Mr. Wheeler stated that a large amount of effective work was being done in that locality, and with very encouraging results, and he expressed the opinion that in course of five years Silver City would be as large a camp, if not larger, than Eureka.
